## Test Analytics Overview

Test Analytics is an added tool that comes with Smart Reader. Test Analytics is for analysis on the various test conducted in your institute, it directly import data from Smart Reader database or it can import data from some other database also. Test Analytics prepares various report from the data captured from the OMR form and gives you text and graphical reports. The reports can be exported to MS-Word or MS-Excel. The reports can also be viewed by students/parents online with Online Test Analytics which provide students/parents same test reports online.

### **Test Creation:**

You can create various tests and keep their records and retrieve them as desired. You can also create the section in the test like 1-50 Physics, 51-100 Chemistry etc. Now you can get subject wise topper and rank details.

### **Data Import:**

Test Analytics can import data from Smart Reader database and other database too. You can categories the data in two categories.

### **Reports:**

- Test Report
- Subject Wise Test Report
- Individual Test Report
- Individual Subject Wise Test Report
- Each Question Percentage Report
- Comparative Analysis with Topper
- Percentage Test Report

### **Online Test Analytics:**

Online Test Analytics publishes the result on web, the database is same used for Test Analytics. The student/parent can login to the website and view their performance in the entire tests conducted. Following are the reports available.

- Subject Wise Detailed Report
- Total Marks Report
- Subject Wise Percentile Report (Graph)
- Test Code Wise Report (Graph)
